

PROFILE

Computer Science master's student at Dalian University of Technology under the Chinese Government Scholarship (CSC), with a bachelor's degree in Software Engineering from Zhengzhou University. Current research focuses on reinforcement learning for compiler optimization and autonomous trajectory planning, multi-agent path prediction, SAT-solving workloads, and battery modelling. Combines research and software engineering with hands-on experience in IT operations, international sales, SEO, technical communication, multilingual customer engagement, and visual design.

EDUCATION

MSc in Computer Science

Dalian University of Technology | Dalian, China | 2025 - Present

Chinese Government Scholarship (CSC). Research interests include reinforcement learning, intelligent optimization, autonomous systems, compiler optimization, and multi-agent decision making.

Bachelor's in Software Engineering

Zhengzhou University | Zhengzhou, China | 2021 - 2025

CGPA: 3.52/4.00. Core studies included algorithms and data structures, operating systems, computer networks, databases, embedded systems, AI, machine learning, mobile development, network security, probability, linear algebra, and calculus.

CURRENT RESEARCH

LLVM Pass Optimization for SAT Solving	RL-Guided LLVM Pass Selection
Investigating pass ordering and measurable compiler-performance gains for SAT-solving workloads.	Learning policies that select effective LLVM optimization passes while balancing search cost and program performance.
RL-Guided UAV Trajectory Selection	Multi-Agent Path and Trajectory Prediction
Exploring fast, accurate, and resource-aware trajectory selection for autonomous aerial systems.	Studying coordinated path prediction and best-way finding for multiple agents in dynamic environments.
PP2D Spatial Modelling	Battery DFN Model
Early-stage work on spatial reasoning and path-planning methods.	Ongoing work with the Doyle-Fuller-Newman electrochemical model for battery behaviour and prediction.

PUBLICATIONS

The Future of Scrum in AI-Driven Software Development: A Systematic Review

Journal of Engineering and Applied Sciences Technology 8(6), 1-9 | 2026

Gazi Sabbir Ahammad, Sujan Acharya, Ahnaf Aiman Abdi, Golam Mahadi.

Spot It! A Mathematical Approach to Offline Games - Reducing Screen Time and Enhancing Cognitive Development in Children

RA Journal of Applied Research 11(03), 97-105 | March 2025 | First author

Golam Mahadi, Gazi Sabbir Ahammad, Ahnaf Aiman Abdi. DOI: 10.47191/rajar/v11i3.04

Assessing the Future Influence of Tourism-Related Factors on Economic Growth in Selected South Asian Countries Through a Random Forest Approach

Forum for Economic and Financial Studies 3(1), 2519 | March 2025

Sujan Acharya, Md Shahriar Kabir Sajib, Ahnaf Aiman Abdi, Golam Mahadi. DOI: 10.59400/feFs2519

ICT Education and Employment Disparities: A Comparative Study of Developed and Developing Countries

North American Academic Research 7(11), 11-19 | November 2024

Md Shahriar Kabir Sajib, Golam Mahadi, Israt Roy, Md Minarul Islam. DOI: 10.5281/zenodo.14246913

Research, software engineering, and international technology operations

PROFESSIONAL EXPERIENCE

IT and Foreign Sales Department

Dayang International Company | China | June 2025 - Present

Manage and support company website operations, digital marketing, SEO, promotional boosting, posters and product catalogues; translate Chinese and English business content; communicate with international customers; and assist with product promotion and day-to-day technology needs.

Personal IT Assistant and Creative Specialist

Independent / Chany Zagury | Montreal, Canada (Remote) | August 2023 - Present

Provide long-term technical support, troubleshooting, website improvements, system maintenance, data backup, educational product design, email templates, branding, and child-friendly Hebrew book materials.

Graphic Designer

School of International Education, Zhengzhou University | April - June 2024

Directed the visual system for a university cricket tournament, including posters, player profiles, banners, team logos, jerseys, trophies, medals, and promotional graphics.

SELECTED PROJECTS

- Human Age, Gender, and Object Recognition: OpenCV and pre-trained models for real-time visual analysis.
- T20 Cricket Winner Prediction: Machine-learning inference delivered through a microservice architecture.
- Collaborative Document Editing System: Real-time editing, versioning, and secure document management across services.
- Facial Recognition Seat Assignment: Rule- and priority-based seat allocation with assignment history.
- Multitask Android Application: Team-led Java application combining calculator, compass, calendar, weather, and alarm functions.
- Library Seat Booking System: Requirements-led JavaScript application with complete software requirements documentation.

TECHNICAL SKILLS

Programming	Python, C, C++, Java, JavaScript, HTML, CSS, XML, JSON
AI and Research	Reinforcement learning, machine learning, computer vision, LLVM, SAT solving, multi-agent systems, UAV path planning, battery DFN modelling
Libraries and Data	OpenCV, NumPy, Pandas, SciPy, Matplotlib, scikit-learn, PyTorch; MongoDB, Firebase, Mongoose
Software and Web	Node.js, Express, REST services, microservices, Git/GitHub, Android Studio, VS Code, WordPress, SEO
Creative and Business	Adobe Photoshop, Illustrator, Premiere Pro, Lightroom, Acrobat; product catalogues, marketing, international customer communication, translation

LANGUAGES, RECOGNITION, AND INTERESTS

Languages	Recognition	Interests
Bengali (native); English (professional); Chinese, Hindi, and Urdu (working/conversational).	3rd place, ZZU International Essay Writing Competition; Chinese Development Summer Tour; university cricket and 5 km marathon participation.	Artificial intelligence, teaching, cricket, interdisciplinary research, technical communication, and cross-cultural collaboration.
